

# Charging at Electrify America

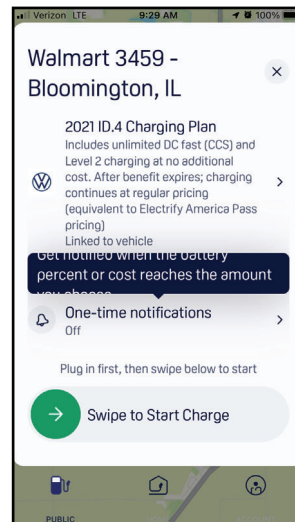

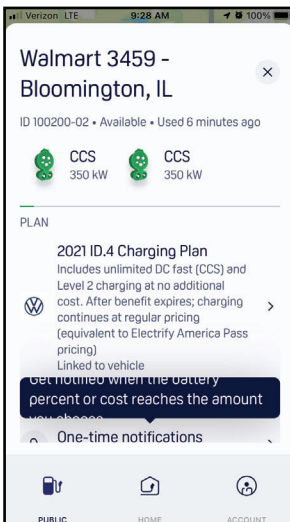

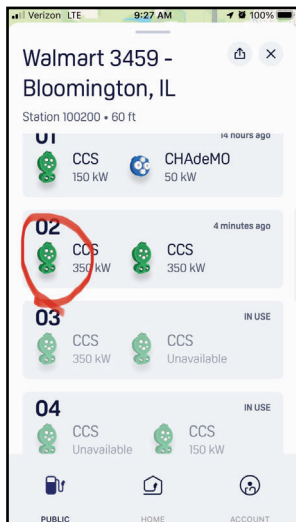

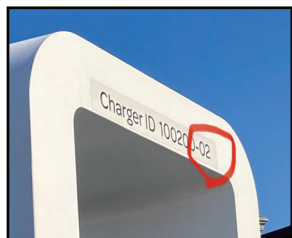

You can charge with credit card but by using the app you will get better rates. As the charger says, Plug-in first, find station on the app look for charger number at top of charger.

EA is the largest public Direct Current Fast Charging network for non Tesla EVs. DCFC makes cross country trips with EVs possible. Log onto the charger with either a RFID credit card or using the EA app. With a credit card login - follow instructions on the screen

Select charger by tapping on the app.

If you have a charging plan it will show up on the EA app.

Go to bottom of that page on app and swipe to start.

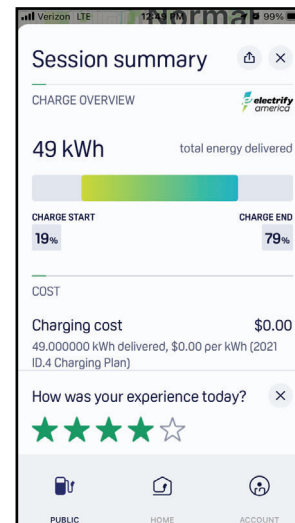

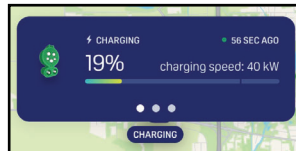

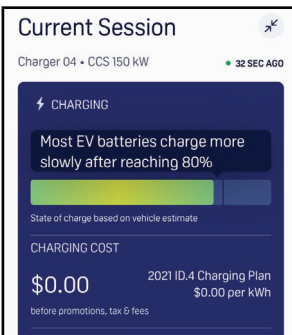

The Current Session screen pops up when charging starts.

Status of the session is updated in the app. To see different screens, swipe left or right.

Stop charging on the charger or the panel in the car. If plug is locked, unlock the car

After you're done you will get a session summary.

## Bonus !!!

When planning a trip you can check on the App and find out if any of the locations you want to use are having maintenance done. Sometimes an "unavailable" charger can be started by inserting chip credit card.
